Fostering Entrepreneurship through Freelancing

## Freelancer Competences - A Research Framework

This document contains the methodology description that lead to (1) to identification of essential competences for freelancers including skills (universal, digital, other domain-specific skills,...), knowledge, and attitudes – and (2) to develop a reliable and valid assessment tool, that is, the Competency Assessment Tool (CAT) that allows freelancers to evaluate their competences and better align their learning needs with available training resources.
